**First International Conference on
Chemical Education
(ICCE-1)**

November 12 - 14, 2010

Association of Chemistry Teachers (ACT) and Homi Bhabha Centre for Science Education (TIFR) are pleased to announce the first International Conference on Chemical Education (ICCE-1) to be held in November 2010. The main aim of the conference is to acquaint chemistry teachers with the vibrant field of chemical education. The conference will have key note addresses, review talks, oral presentations and workshops related to chemistry content, pedagogy of chemistry and research in chemical education at tertiary level.

Chemical Education as a field was initiated in 1970s and has been significantly contributing to teaching and learning of chemistry at different levels. Research in this field has covered various important areas such as students' conceptions, problems associated with teaching and learning of chemistry, problem solving (conceptual as well as algorithmic), comparison of strategies used by novices and experts for solving problems in chemistry, laboratory courses (their aims and usefulness), use of technology for teaching concepts in chemistry and so on.

Association of Chemistry Teachers (ACT) has been instrumental in initiating and continues to carry out chemical education activities in the country (<http://www.iactindia.org>).

Homi Bhabha Centre for Science Education (HBCSE) is a National Centre of the Tata Institute of Fundamental Research (TIFR), Mumbai and is the country's leading institution for research and development in science, technology and mathematics education. (<http://www.hbcse.tifr.res.in>)

The Association of Chemistry Teachers and Homi Bhabha Centre for Science Education is organizing this conference with the aim that it will emerge as a regular constructive platform for exchange of academic ideas through interactions of National and International peer groups.

Detailed programme of the conference is available on <http://www.iactindia.org>
